

2025 TCM Clinical Mastery Program

The 2025 TCM Clinical Mastery Program was organized by the Chulabhorn International College of Medicine (CICM), Thammasat University, in collaboration with the Department of Thai Traditional and Alternative Medicine (DTAM), Ministry of Public Health, Thailand, and Chengdu University of Traditional Chinese Medicine (CDUTCM), China.

The program was conducted online from 1 July to 5 August 2025 and aimed to support the continuing professional development of Traditional Chinese Medicine (TCM) practitioners in Thailand. A total of 595 participants registered for the program, including TCM practitioners from public institutions, universities, private clinics and hospitals, CICM graduates and students, and other medical personnel.

The program combined **specialist TCM knowledge, clinical experience, practical applications, and continuing professional education**, with training delivered by experienced TCM experts.

Program at a Glance

Item	2025 Program
Program Period	1 July – 5 August 2025
Delivery Mode	Online training
Registered Participants	595 participants
Main Participants	TCM practitioners, medical personnel, CICM graduates, and senior TCM students
Professional Background	Public institutions, universities, private clinics and hospitals, and the CICM professional network
International Collaboration	CICM, Thammasat University; DTAM, Ministry of Public Health, Thailand; and CDUTCM, China
Program Structure	10 online training sessions
Program Focus	Continuing professional development and enhancement of clinical knowledge and skills in Traditional Chinese Medicine
Learning Approaches	Expert lectures, clinical knowledge sharing, case-oriented teaching, practical demonstrations, and video-based learning

Item	2025 Program
Assessment	Participation monitoring and end-of-session assessment
Continuing Education	Continuing education credits for eligible TCM practitioners
Certificates	470 certificates issued: 461 participants and 9 lecturers
Key Outcomes	Professional knowledge development, clinical application, continuing professional education, and strengthening of TCM academic and professional networks

Participant Profile

The program attracted a broad professional audience. A total of 595 participants registered for the 2025 TCM Clinical Mastery Program, including TCM practitioners, healthcare personnel, CICM students and alumni, and members of the wider TCM professional community in Thailand.

Among the registered participants, 511 were TCM practitioners and 4 were other healthcare personnel. Participants represented a range of professional settings, including government and public healthcare institutions, universities, hospitals, private clinics, and professional organizations, reflecting the program's reach across different sectors of TCM practice in Thailand.

In addition to general registration, the program provided complimentary participation to selected institutions and organizations within CICM's professional and academic network, supporting wider access to continuing professional education and strengthening collaboration across Thailand's TCM community.

Professional and Academic Network Participation

As part of the 2025 program, CICM provided complimentary participation to selected partner and network organizations. This initiative enabled TCM practitioners and related healthcare personnel from participating institutions to access the training without registration fees.

The network represented a broad range of organizations, including government and public health agencies, public and private hospitals, universities and higher education institutions, military medical services, and TCM professional organizations.

Participating network organizations included:

1. Department of Thai Traditional and Alternative Medicine, Ministry of Public Health
2. Huachiew Traditional Chinese Medicine Clinic
3. Don Tum Hospital
4. Charoenkrung Pracharak Hospital
5. Krathum Baen Hospital
6. Royal Thai Army Medical Service / Chulachomklao Royal Military Academy Hospital
7. Hospital under the Department of Thai Traditional and Alternative Medicine
8. Thian Fah Foundation Hospital
9. Chonburi Hospital
10. Sunpasitthiprasong Hospital
11. Phra Nang Klao Hospital
12. Traditional Chinese Medicine Doctors Association Thailand
13. Golden Jubilee Medical Center, Mahidol University
14. Huachiew Chalermprakiet University
15. Chandrakasem Rajabhat University
16. Mae Fah Luang University
17. University of Phayao
18. Rangsit University
19. Chiang Rai College
20. Suan Sunandha Rajabhat University
21. Nakhonratchasima College

Through this network-based participation, the program broadened access to continuing professional education while strengthening institutional collaboration and professional knowledge exchange among TCM practitioners across Thailand.

Participation and Training Outcomes

The program consisted of 10 live online training sessions, with participation maintained throughout the training period. Across individual sessions, recorded participation ranged from approximately 88% to 100% of registered participants.

Participants were required to attend the online training and complete the designated assessments. Those who fulfilled the program requirements were eligible to receive continuing education credits for professional development in Traditional Chinese Medicine.

At the completion of the program, 461 participants received certificates. Together with certificates issued to 9 lecturers, a total of 470 certificates were issued.

What Participants Gained

Through the program, participants were provided opportunities to:

- strengthen their professional and clinical knowledge in Traditional Chinese Medicine;
- learn directly from experienced TCM experts through live online lectures;
- connect classical TCM knowledge with contemporary research and clinical experience;
- enhance clinical understanding through case-oriented teaching and practical demonstrations presented during the online sessions;
- apply acquired knowledge to clinical practice and patient care;
- engage in continuing professional development relevant to TCM practice;
- exchange knowledge among practitioners from public healthcare, academic, hospital, and private-sector settings; and
- strengthen professional and academic connections among CICM, DTAM, CDUTCM, participating institutions, and the wider TCM professional community in Thailand.

The program therefore served not only as a continuing education activity but also as a platform for professional knowledge exchange, network engagement, and international academic collaboration in Traditional Chinese Medicine.

Participant Feedback and Program Development

Participant feedback highlighted the clinical expertise of the lecturers and the value of integrating classical TCM knowledge with contemporary research and clinical practice. Clinical examples and practical demonstrations were particularly useful in supporting the application of knowledge to professional practice.

One of the main areas identified for improvement was the stability of live online delivery, particularly internet connectivity during lectures delivered internationally. Feedback also suggested further development of learning materials, greater emphasis on advanced clinical content, improvement of online assessment systems, and more flexible access to learning content.

These findings were subsequently used to inform the design of the 2026 TCM Clinical Mastery Program. In particular, the 2026 program shifted from fully live online lectures to a model combining pre-recorded lectures with scheduled Live Q&A sessions, while continuing the program's commitment to professional network participation and continuing education.

Highlights from the 2025 TCM Clinical Mastery Program

- 595 Registered Participants
- 10 Live Online Training Sessions
- Complimentary Participation for Professional and Academic Network Organizations
- Participation across Government, Healthcare, Academic and Professional Sectors
- International Academic Collaboration between Thailand and China
- Expert-Led Traditional Chinese Medicine Training
- Clinical and Practice-Oriented Continuing Education
- 461 Participants Receiving Certificates
- Strengthening of the TCM Professional Network in Thailand

TCM CLINICAL MASTERY PROGRAM

ประจำปี 2568

ระหว่าง วันที่ 1 กรกฎาคม - วันที่ 5 สิงหาคม พ.ศ. 2568

เวลา 18.00 – 20.00 น.

อบรมภาษาจีน/ Online ผ่านระบบ Zoom meeting

1,500 บาท/คน

1 กรกฎาคม 2568

รศ. ดร.หลี่ เจวี่ยน

ความเข้าใจของแพทย์แผนจีน
ต่อโรคหลอดเลือดสมอง

22 กรกฎาคม 2568

พว. กวี่ หย่า-กวง

การประยุกต์ใช้การบำบัดด้วยการฝัง
เข็มแบบพิเศษอื่นๆ ในการรักษาโรค
หลอดเลือดสมอง (ตอนที่ 1)

3 กรกฎาคม 2568

รศ. สยง เสี่ยว-อี

ความเข้าใจของแพทย์แผนปัจจุบัน
ต่อโรคหลอดเลือดสมอง

Overall, the 2025 TCM Clinical Mastery Program combined continuing professional education with international academic collaboration and national professional network engagement. By providing both general registration and complimentary access for selected network institutions, the program extended TCM continuing education across diverse healthcare and academic settings in Thailand. The experience gained from the 2025 program also informed the redesign of the 2026 program, particularly its online learning format and delivery system.
